### OBJECTIVE:

A highly motivated computer science student with a passion for Programming and problem-solving, seeking an opportunity in the Field of Software Engineering to apply my technical skills in a real-World environment and contribute to innovative projects.

### SKILLS

- **Programming Languages:** Java, Python, C, JavaScript, OOP
- **Web Development:** React, Next.js, Express, Tailwind Css
- **Database Management:** SQL, DBMS, Prisma ORM
- **Tools and Technologies:** Git/GitHub, Linux Commands

### EDUCATION

❖ CSE | JNTUHCES

CGPA: 7.0 | (2024)

❖ Intermediate | Narayana

90.8% | 2021

### ACADEMIC PROJECTS

**The Part-Time Job Finder:** is a web application designed to help users easily discover and apply for part-time job opportunities. It features job listings, a search functionality that allows users to filter jobs based on their preferences, and user profiles, enabling early access to relevant opportunities. The application is built using React.js for the frontend, ensuring a responsive and dynamic user interface, while Express.js powers the backend to handle server-side logic and API requests. MongoDB is used as the database to store job listings and manage user data efficiently.

**A Password Generator** tool was developed to provide users with unique passwords. The generator allows users to customize the length of the password and select specific character types such as letters, numbers, and symbols, ensuring flexibility and security for their needs.

### CERTIFICATIONS

- Completed MERN stack course from Harkirat Singh

### HOBBIES

- Traveling
- Reading novels
